RESPONSE TO NOTIFICATION OF DEFECTIVE RESPONSE

Sir:

Applicant responds to the Notification of Defective
Response as follows:

The Notification of Defective Response states that the
declaration of the inventors does not comply with 37 CFR 1.497(a)
and (b) in that the title has not been translated into English.
Applicant requests that the Notification of Defective Response be
withdrawn, and the application forwarded for prosecution on the
merits.

While not stating so explicitly, it appears that the
Notification relies on 37 CFR § 1.497 (a) (2), which requires

that the declaration identify the specification to which it is directed. The Manual of Patent Examining Procedure (MPEP) provides the details of the requirement for such identification.

MPEP 602 VI specifies the minimum requirement for identification of the application. Specifically in connection with declarations filed after the filing date of the application, the application may be identified by either the application number or the serial number and filing date. The declaration as filed clearly identifies the International application PCT/DE2004/000870, as well as its filing date of April 26, 2004.

While it is true that the Declaration provides the title of the application only in German, this does not render the Declaration defective. As the identified MPEP section makes clear, the Declaration need not identify the title at all. The Declaration must precisely identify the application, and the original Declaration does so.

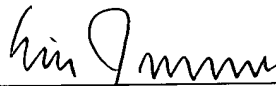

As the declaration as originally filed is believed to be in full compliance with the rules of U.S. practice, applicants respectfully request reconsideration and withdrawal of the Notification of Defective Response and prompt consideration of the present application as to its merits.

If the Examiner has any questions or requires further clarification of any of the above points, the Examiner may

contact the undersigned attorney so that this application may
continue to be expeditiously advanced.

Respectfully submitted,

YOUNG & THOMPSON
